DANIELE TIEMI HIGA

Full-stack WEB DEVELOPER

Creative-thinker, I enjoy solving puzzles and building all sorts of things.

I am looking to turn my lifetime passion for tech into a solid career, by combining my programming and problem-solving skills to develop amazing web apps.

Functionality first, but I also like a nice feel and touch on my work.

My **superpower** is to make things happen.

< Projects />

MARKET BUDDY

Web and Mobile App

A smart grocery list, where users build their shopping lists and the web app compares the different prices of each product per store in our API.

The mobile component allows users to login, view their lists, and check off items as they shop. People's choice winner, Market Buddy is my final team project at Lighthouse Labs.

Tech Stack +

NodeJS	ReactJS
Express	Materialize
Postgres	React Native
RestAPIs	React Router

TO DO-ist

Web App

A smart, auto-categorizing app, which helps users to easily organize their to-dos. Just add the item and it is added to the correct category. As a team, we all got involved with every step of the project. I have contributed exploring different APIs services and balancing their performance to accurately categorize the items added to the list.

Tech Stack ++

NodeJS	JavaScript
Express	jQuery
Postgres	Bootstrap
RestAPIs	Sass

TWEETER

Web App

This web app is a simple Twitter version.

A client-side single-page app (SPA) that communicates with the server via AJAX calls.

Built with full-stack Javascript, the messages are persisted to MongoDB and survive when the server restarts.

It is deployed on Heroku.

Tech Stack +++

NodeJS	JavaScript
Express	jQuery
MongoDB	Heroku
Ajax	

< Employment />

Kaplan International

IELTS Invigilator

Vancouver-BC

IELTS is the English proficiency test, accepted by the Canadian government for immigration purposes, which demands **attention to detail** and **responsibility**.

This position requires great **team work** to make the environment less stressful for the candidate and keep the pace as smooth as possible, without compromising the integrity of the test and ensuring the compliance with the organization quality standards.

2018

St. John's College Dining Society

Kitchen Helper

Vancouver-BC

Highly improved my **team-player** skills, while being part of the kitchen staff and working in a fast-paced environment, demanding a good **time-management**. Developed my **problem-solving** skills when dealing with unexpected situations - whether related with guests or with the kitchen environment.

2015
to 2018

NoFrills

Cashier

Vancouver-BC

Improved my **customer service** and **leadership** skills, while assisting customers and performing supervisor's duties when necessary, such as, training new employees. A **good relationship** was built during my first experience working with this company and, when I returned to Vancouver, they offered me a position back in their team.

2013
to 2015

Via Life Clinic

São Paulo-SP

Clinic Owner & Physiotherapist

The company offered clinical services, homecare, workshops, psychological support and personality analysis for companies. As an entrepreneur, I developed **management skills**, my business experience and being part of a team. As a physiotherapist, I gained professional and life experience, while developing **empathy** and interpersonal **communication skills**.

2005
to 2013
